

AMENDMENTS TO THE CLAIMS

Please amend the Claims as follows:

1. (Currently Amended) An automatic price correcting system ~~in which the seller and the buyer communicate with each other via a network, connected with a buyer's computer and a seller's computer, for correcting a standard price of an article, which has been presented by the seller based on a specification of the article, according to changes in the standard specification,~~ the system comprising:

a standard price storing section for storing a price presented by the seller in response to specifications of an article presented by the buyer, as a standard price;

a standard specifications table for storing specifications presented by the buyer;

a correction table for storing information required to correct the standard price of the article, presented by the seller; and

a control device adapted to convert difference between the specifications of the article stored in the standard specifications table and changed specifications of the article, into a correction value of price, ~~through~~ through means of referring to the correction table, when the specifications of the article are changed and to correct the standard price stored in the standard price storing section using the correction value of price and to send the corrected standard price to the computer of the buyer.

2. (Original) An automatic price correcting system according to claim 1, wherein the control device is adapted to obtain difference between the specifications of the article stored in the standard specifications table and changed specifications of the

article, for each item of the specifications, to convert the difference of the specifications for each item of the specifications into a correction value of price through means of referring to the correction table and to correct the standard price stored in the standard price storing section by a total of correction values, which is a sum of correction values of prices for respective items of the specifications.

3. (Original) An automatic price correcting system according to claim 2, wherein the correction table stores unit prices for units of respective items of the specifications.

4. (Original) An automatic price correcting system according to claim 1, wherein the control device is adapted to provide for the buyer a specifications change inputting screen for inputting changes in the specifications, to calculate a corrected standard price in response to changed specifications input through the specifications change inputting screen, and to present the corrected standard price to the buyer.

5. (Original) An automatic price correcting system according to claim 4, wherein contents of the correction table are displayed on the specifications change inputting screen.

6. (Original) An automatic price correcting system according to claim 4, wherein the correction table is associated with the specifications change inputting screen

so that for respective items of the specifications displayed on the specifications change inputting screen, the buyer can refer to the correction table corresponding to the items of the specifications.

7. (Currently Amended) A method for automatically correcting a price, in an automatic price correcting system, connected with a computer of a buyer and a computer of a seller, for correcting a standard price of an article, which has been presented by the seller based on a specification of the article, according to changes in the standard specification, the method comprising the steps of:

storing, in a standard price storing section, a price presented by the seller in response to specifications of an article presented by the buyer, as a standard price;

storing specifications presented by the buyer in a standard specifications table;

storing information required to correct the standard price of the article, presented by the seller in a correction table;

converting difference between the specifications of the article stored in the standard specifications table and changed specifications of the article, into a correction value of price, ~~through~~ through means of referring to the correction table when the specifications of the article are changed; and

correcting the standard price stored in the standard price storing section using the correction value of price; and

sending the corrected standard price to the computer of the buyer.

8. (Original) A method for automatically correcting a price, according to claim 7, wherein the step of converting into a correction value of price further comprises the steps of:

obtaining difference between the specifications of the article stored in the standard specifications table and changed specifications of the article, for each item of the specifications;

converting the difference of the specifications for each item of the specifications into a correction value of price through means of referring to the correction table; and

correcting the standard price stored in the standard price storing section by a total of correction values, which is a sum of correction values of prices for respective items of the specifications.

9. (Original) A method for automatically correcting a price, according to claim 8, wherein the correction table stores unit prices for unit of respective items of the specifications.

10. (Original) A method for automatically correcting a price, according to claim 7, further comprising the steps of:

providing for the buyer a specifications change inputting screen for inputting changes in the specifications;

presenting the corrected standard price to the buyer in response to changed specifications input through the specifications change inputting screen.

11. (Original) A method for automatically correcting a price, according to claim 10, wherein contents of the correction table are displayed on the specifications change inputting screen.

12. (Original) A method for automatically correcting a price, according to claim 10, wherein the correction table is associated with the specifications change inputting screen so that for respective items of the specifications displayed on the specifications change inputting screen, the buyer can refer to the correction table corresponding to the items of the specifications.
